

# Paper Tape

*Specialized cross-fibre paper fortified with extra tensile strength to prevent tearing, wrinkling, or stretching.*

**Gyproc® Paper Tape is designed to strengthen joints and corners in interior gypsum drywall surfaces with Gyproc® All Purpose Joint Compound. Its positive crease makes it easier to apply in corners, and it can be used both dry or damp. When used together with the Gyproc® All Purpose Joint Compound, the tape provides exceptional joint strength. Additionally, the paper tape can also be utilized for repairing cracks or damaged plasterboard, offering a convenient and speedy solution.**

## CHARACTERISTICS

Cross-fiber paper has been designed with additional tensile strength to inhibit tearing, wrinkling, or stretching. It also features spark perforation and chamfered edges, which decrease the possibility of bubbling or blistering.

## PRODUCT FORMAT

Roll Width	50mm
Roll Length	150m
Quantity Per Box	10rolls

## APPLICATION

- Prepare the substrate by ensuring it is clean, dry, and free of dust. Minor defects such as paper scuffs and damages should be corrected.
- Adequate ventilation in the building is necessary to help dry the finishing materials.
- It is crucial to follow appropriate health and safety procedures while working on the site, such as using protective clothing and equipment. The notes provided are general guidance, and specific project solutions must be considered based on the design criteria.
