## Habito®

Habito® boards are part of a new generation of products specially designed to allow you to style your living space in a fast and functional way.

Gyproc® walls made of Habito® boards are strong and durable, with good sound-insulation qualities, and are more user friendly than traditional walls. As a result, they are the ideal way to adapt living spaces to current and future needs.

## CHARACTERISTICS

Habito® boards give you the flexibility to restyle or renovate rooms or even redesign your entire home. The unique composition of the plaster core gives Habito® boards their exceptional qualities allowing objects weighing up to 30kg to be hung with a 5mm simple chipboard screw. Whether you are installing curtain rods, flat screens, wall bars, cabinets, or paintings, mounting objects will not get any easier. Achieves a severe duty rating in a single board partition system and satisfies BS 5234: Part 2 for strength and robustness requirements.

## PRODUCT FORMAT

Thickness	12.5mm
Nominal Weight	12.45kg/m <sup>2</sup>
Nominal Sheet Size	1200mm x 2400mm
Edge Type	Recessed Edge 

## FIRE RATING

- Non-combustible in accordance to BS 476: Part 4
- Classified as Class 0 material in accordance to BS 476: Part 6 & 7
- Complete drywall system providing up to 1 hour fire rating in accordance to BS 476: Part 22

## EXTREME SHOCK-RESISTANCE

Thanks to its solid core, Habito® boards are up to five times stronger than regular boards and are more resistant to repeated impacts of children playing, moving furniture, and everyday wear and tear.

## SOUND INSULATION

Gyproc® walls made from Habito® boards together with metal stud sections and mineral wool reduce noise from adjacent rooms.

### EASY TO INSTALL

Despite its special strong plaster core, Habito® boards are easy to trim (cut the board with a safety cutter and apply pressure to break). Recommend score and snap size is 15 cm.

### MANUFACTURING SPECIFICATIONS

- In compliance with ASTM C1396M and BS EN 520

### TIPS

- Always use coarse-thread screws with a diameter depending on the object
- Screw thread must always run up to the head
- No special tools or plugs needed, simply secure the screw on the board with a crosshead screwdriver
- Always follow the manufacturer's instructions, e.g. if a TV plus wall bracket weighs 20kg and the bracket has to be fixed to the wall at four points, you must use four screws, even though the load-bearing capacity is 120kg
- When choosing the screw length, always factor any piping or cables running behind the wall

### IMPORTANT

Always use No.10 wood screws to mount Habito® boards. Use a cordless electric screwdriver that operates at no more than 500 revs per minute. The maximum weight per one fixing point is 30 kg.

### HEALTH AND ENVIRONMENTAL CONTRIBUTIONS

- Made from 100% natural gypsum
- Recyclable material, hence environmentally friendly and certified with Green Product Certification Scheme
- Does not produce toxic fumes or hazardous substances that are harmful to health
- Product is manufactured in a facility certified to standards of ISO 14001, ISO 45001, and ISO 9001
